REISSUE APPLICATION DECLARATION BY THE INVENTOR		Docket Number (Optional) 112.P56033RE
---	--	--

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 5,302,966, granted April 12, 1994 and for which a reissue patent is sought on the invention entitled ACTIVE MATRIX ELECTROLUMINESCENT DISPLAY AND METHOD OF OPERATION

the specification of which

is attached hereto.

was filed on May 23, 1995 as reissue application number 08/447,717

and was amended on _____
(If applicable):

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

by reason of a defective specification or drawing.

by reason of the patentee claiming more or less than he had the right to claim in the patent.

by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

Statement of error: Patentee claimed less than he was entitled to in claims 1-7 of the patent at issue. For example, claim 7 is a method claim, which calls for, in part: "A method of operating an active matrix electroluminescent display, said display comprising a plurality of pixels, each pixel including a first transistor having its gate connected to a select line, its source connected to a data line and its drain connected to the gate of a second transistor, the second transistor having its source connected to the data line and its drain connected to a first electrode of an electroluminescent cell, the electroluminescent cell having a second electrode, the method comprising the steps of", whereas new claim 8 is a method claim, which calls for, in part: "In an electroluminescent display comprising an array of pixels, where each pixel contains a circuit for controlling application of energy to an electroluminescent cell associated with each pixel in said array of pixels, a method of providing gray scale illumination during a frame period comprising the steps of". These claim limitations of claim 7 may be potentially limiting, but are not believed to be necessary for patentability.

Additionally, claim 1 is an apparatus claim, which calls for, in part: "said electroluminescent cell having a second electrode which is connected to means for providing an alternating voltage power source with the voltage power source means being connected between the second electrode and a source of reference potential." These claim limitations may be potentially limiting, but are not believed to be necessary for patentability. At least some of these claim limitations are not present in one or more of new apparatus claims 14-32.

WARNING:

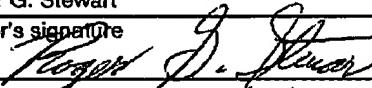

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine and imprisonment, or both, under 18 U.S.C. 1001, and that such willful false statements may jeopardize the validity of the application, any patent issuing thereon, or any patent to which this declaration is directed.
